

SPEAKEASY BUSINESS ETHERNET

Business Ethernet delivers more bandwidth at a lower cost than other business-class broadband options.

Business Ethernet is ideal for small businesses that require reliable, high-speed, cost-effective Internet solutions.

If your business has intensive bandwidth needs, such as multimedia content transfer, large file uploads, remote workers, or multiple locations, there's no better value than Speakeasy Business Ethernet. Easy to install and manage, Business Ethernet utilizes your existing infrastructure. This solution utilizes a reliable copper loop bonding technology to deliver a single symmetrical connection with 99.99% uptime, guaranteed.

Choose a range of symmetrical upload and downloads with speeds up to 20 Mbps, depending on the demands of your business.

For additional savings add Speakeasy Voice, with guaranteed voice quality (QoS), to your Business Ethernet service.

BENEFITS AT A GLANCE

Competitive Pricing

More bandwidth at a lower cost.

Symmetrical Connection

Reliable upload and download speeds give you maximum consistency.

Business-Critical Reliability

Guaranteed 99.99% uptime.

Use Your Infrastructure

Easy to install and manage because it uses your existing infrastructure.

“We need a lot of bandwidth because we have VPNs for remote access and certain graphically intensive trading applications. We also maintain several websites, and we need good reliability for links to data providers. Business Ethernet is an excellent value for so much symmetrical bandwidth and redundancy is built in. It was attractive to us right from the beginning.”

Bhaskar Manda – Financial Engineer, General Welfare Group

Superior Service Across the Country. Speakeasy’s extremely fast, reliable broadband connection can help grow your business. From connecting remote offices to extraordinary customer support, Speakeasy sets the industry standard nationwide.

Business Ethernet is available in: Atlanta, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Houston, Las Vegas, Los Angeles, Miami, Minneapolis, New Jersey/New York, Philadelphia, Phoenix, San Francisco, Seattle, Washington DC, and many other markets.

Business Ethernet Technology. Business Ethernet is different than a T1 connection because it uses a loop bonding technology, while Bonded T1s use a link-bonding technology. Although both are effective, loop bonding is a newer technology that reduces overhead and deals with loop failure more efficiently. That means more bandwidth remains available for applications and your connection is less likely to suffer if one loop fails.

THE SPEAKEASY ADVANTAGE

Privately Managed, Nationwide Network. Built for speed, security, and flexibility.

Convenience. One provider for all your voice, data, and hosting needs.

Simple and Predictable Pricing. Our pricing structure helps manage monthly costs.

Legendary Customer Support. Experienced, U.S.-based technical and account service, 24/7/365.

Part of the Best Buy family. Aligned with Best Buy for Business as advocates of technology and communications solutions for small businesses.
