

SPEAKEASY T1 SERVICE

Speakeasy T1 service gives small and medium-size businesses fast and reliable broadband access.

Speakeasy T1 and Bonded T1 services are designed to accommodate expanding businesses. Both are flexible enough to grow with your business easily and cost-effectively, while guaranteeing business-quality connectivity. Reliable upload and download speeds (1.5 Mbps, 3.0 Mbps, 4.5 Mbps, and 6.0 Mbps symmetrical) give you dependable consistency. Speakeasy's T1 and Bonded T1 services are backed by a Service Level Agreement (SLA) that guarantees 99.99% uptime.

Choose a single 1.5 Mbps T1 connection or our Bonded T1s, which allow businesses to increase bandwidth up to 6.0 Mbps. Bonding enables several circuits to operate as a single connection. With a faster connection, you can handle more workload, more quickly, without requiring server space.

For additional savings add Speakeasy Voice, with guaranteed voice quality (QoS), to your T1 Service.

BENEFITS AT A GLANCE

Competitive Pricing

Price includes port, loop, bandwidth, and full throughput with no hidden charges.

Nationwide Coverage

Speakeasy's private, nationwide fiber network provides maximum security and business-critical reliability.

Guaranteed Uptime

A service-level agreement (SLA) guarantees 99.99 % uptime and 4-hour problem resolution.

24/7/365 Support

Our most experienced agents are on call and own any issue from start-to-resolution.

“We weren’t looking for a single provider for our voice service, T1, and managed hosting, but once we started working with Speakeasy all their services were compelling. Speakeasy just makes it all so easy. It’s a good value, and we don’t have to spend a lot of time thinking about it. We’re able to run in a more streamlined manner and focus more on our business.”

Eric Hennings – CTO, IceBreaker, Inc.

FEATURE	BENEFITS
Prioritized Data Routing	<ul style="list-style-type: none">• T1 traffic gets priority over DSL traffic, increasing the performance, availability, and security of your business connections.• Multiple OC3s and DS3s at each POP ensure there’s always enough capacity.
Robust Service-Level Agreements (SLAs)	<ul style="list-style-type: none">• Reliable uptime ensures data integrity and keeps your fast-paced business online and moving.• Guarantees for 99.99% uptime, low latency and packet loss, as well as a four-hour repair SLA.
Guaranteed Bandwidth	<ul style="list-style-type: none">• A unique network architecture guarantees you get what you pay for at all times (a full 1.5 Mbps connection) and can scale up to 6.0 Mbps quickly, if needed.
Mission-Critical Performance	<ul style="list-style-type: none">• With a guaranteed committed information rate and frame-to-ATM inter-networking, you get the best performance and reliability possible, plus maximum security for your data.• Eight major data centers with multi-redundant connections and peering exchanges mean that if one connection goes down, multiple backup connections are immediately available.
